

TAG SOLVENT PRODUCTS (PTY) LTD

Established in 1977, **TAG Solvent Products** is a formidable player in the local solvent market. Focusing on customer needs, the company has a reputation for unrivalled service, quality and price.

With the largest tank installation in our market, a very well equipped and maintained truck fleet and competent, well trained staff, the company is poised to continue being the market leader in industrial solvents.

TAG Solvent Products serves a multitude of industries including paint and coatings, cosmetics, pharmaceutical, printing, rubber industries, waxes and mining. The company is determined to meet the consumption requirements of small to medium sized industrial solvent users within 100km radius of strategically located tank farm in Knights, Germiston.

Distribution of pre-determined range of solvents in break-bulk form using containers sized between 5 litres and 1000 litres is carried out within 36 hours of receiving orders.

TAG Solvent Products continually aims to be a flexible and reliable supplier that responds quickly and efficiently to customer needs whilst adhering to stringent quality control.

Keeping you Solvent!

Kogasin IV

SPECIAL BLENDS

Basecoat Thinners * Epoxy Thinners * 2 K Thinners * Polyurethane Thinners

HAND CLEANER

Heavy Duty * Pink

Tag Solvent Products features a state of the art tank farm from which product is pumped and blended for distribution to customers. The electrical installation has a hazardous location classification of Zone 2 and we have full generator backup to both offices and plant to ensure uninterrupted supply of product. The pumps are coupled to the high quality flow meters which are regularly calibrated to ensure continued accuracy.

With approximately 1 000 000 litres of underground storage capacity, coupled to our high volume blending facilities we believe we not only have the largest, but the most state of the art installation in the market.

Tag Solvent Products follows a strict **Health and Safety Policy** ensuring compliance with all relevant statutory safety requirements and constantly striving to achieve the highest practical level of safety throughout the company at all stages of manufacture, storage and delivery.

Coupled with this is a stringent **Environmental Policy** which includes regular testing of all aspects of the business including fire equipment, underground installations, products and distribution fleet.
